

The Carl L. Becker House Welcomes

# Marco Steinberg

Associate Professor of Architecture at the Harvard Design School, Steinberg's research focuses on strategic design development within the industrial design/architecture disciplinary boundaries. His current focus is on developing approaches to improving outcomes in stroke treatment within the healthcare industry.

Featured in "40 under 40 Finland" his books include "Prototype for a Plywood Wheelchair", "Material Legacies: Bamboo", he is co-author of "Digital Design and Manufacturing", "Patient Transport Module: Stroke PTM feasibility study", and contributor to numerous other books and publications.
